

PREMIERPRO™
Hybrid Bermudagrass
Performance Backed by Science

Benefits of PremierPRO Bermudagrass:

- Soft, even coverage for striking curb-appeal
- Can withstand heavy traffic
- Heals quickly from divots
- Dark green color, certified high quality
- Adaptable to many different soil types
- Cold-tolerant, greens-up in early spring

A Lawn Your Family Will Live On

When it comes to choosing a lawn for your home, your turf should support your family’s outdoor lifestyle, and look great doing it. PremierPRO Bermudagrass is up to the task. Developed and tested by top turf breeders and researchers, PremierPRO is designed and proven to be hardy enough to withstand heavy foot traffic and cold weather, creating a lawn that is as beautiful as it is durable, season after season.

According to research from the University of Arkansas, PremierPRO ranks #1 in testing for traffic tolerance, giving your family a green space that is proven to handle the stress of regular use. Whether it’s from pets at play or a backyard ballgame, PremierPRO heals quickly from divots and damage, leaving your lawn looking vibrant and lush. Its deep green color has excellent curb-appeal. Narrow leaf blades and even growth mean a soft, velvety lawn that is strong enough to bounce back, even after heavy use.

The experts at the National Turfgrass Evaluation Program confirm that in a range of soils and climates, PremierPRO continues to perform and look its best. PremierPRO stands up to cold stress and greens up again early in the spring, helping you make the most of your outdoor space all year. Don’t let your lawn keep your family indoors — choose a turfgrass that is ready for action when you are. For results you can count on, trust performance backed by science: PremierPRO.
